

FAASTeam presents:

# **EAA Chapter 524 VMC Club - Mastering the Art of Aviation**

The meetings use real-world scenarios to engage members, and allow a free exchange of information that improves awareness and skills. The intent is to create a community of pilots willing to share information, provide recognition, foster communications, promote safety, and build proficiency.

The VMC Club monthly programming is developed and produced by EAA, but it does not use a lecture or presentation format. Instead, an actual scenario is presented and is followed by a group discussion – so audience participation is essential! Since everyone has a different experience level and different airplane capabilities, we can all benefit from the discussion.

**Question of the Month:** If you lose your static port and don't have an alternate static source, you're supposed to break the VSI face. Can you do that? How would you do that? We will have two instruments, and we're going to find out!

**Directions:** Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines. The EAA Chapter 524 Education Center is south of the Frederick Flight Center. Park in front of Frederick Flight Center. Walk south past the Frederick Flight Center building to the first hangar on the flight side - look for the EAA Chapter 524 sign.
